CROSLink™ – wireless hearing

When only one ear can hear

People who can hear with only one ear are faced with disadvantages in many communication situations. When the sound comes from the non-hearing ear, or when noise is present, understanding is a challenge.

CROSLink enables better communication for people whose hearing loss in one ear is so severe, that a hearing instrument cannot be fit to that ear. Regardless of whether the other ear has normal hearing or a hearing loss, CROSLink is the ideal solution.

attractive

from all directions

Unwired for sound

Until now the only available systems were hard-wired. CROSLink offers a wireless, cosmetically appealing solution. No further worries about where to sit in order to hear conversations. CROSLink transforms business meetings, family gatherings and riding in a car, from daunting challenges into rewarding experiences. CROSLink also ensures better sound awareness bringing the additional major benefit of safety, for example, when crossing roads.

Tailor made functionality

After a quick and easy fitting, you are ready to enjoy all the benefits of CROSLink. Whether you choose to use CROSLink with a new hearing instrument or an existing one, you will receive a winning combination. For ultimate convenience, CROSLink is detachable, which means that you can remove it easily when not needed.

funct

Designed for freedom

The design of CROSLink satisfies the highest lifestyle-driven expectations. It is small in size, making it both discreet and comfortable. Optimal freedom of movement is guaranteed by the absence of an unsightly and fragile wire. With CROSLink you can now confidently enjoy hearing from all directions without having to strain or turn your head.

versatile

Do you hear with only one ear? Have you been told that hearing instruments will not help?

CROSLink may help you hear the sounds you have been missing. It is the latest wireless innovation which enables you to hear from all directions in an easy and elegant way with freedom of movement.

CROSLink has no annoying wires and is compatible with a huge range of behind-the-ear hearing instruments. Its discreet design will exceed your cosmetic expectations. This easy-to-use solution opens the door to numerous hearing situations that were previously out-of-bounds, and offers you hearing ability from all directions.

CROSLink is brought to you by Phonak, the world leader in wireless communication.

wireless

easy to fit

The Phonak Group specializes in the design, development, production and worldwide distribution of technologically advanced wireless communication and hearing systems.

The combination of expertise in hearing technology and a strong co-operation with the hearing healthcare professionals allows Phonak to make a substantial improvement in the quality of life, especially of individuals with hearing impairment.

Today, Phonak offers a complete range of digital hearing instruments, along with high-tech specialty products and complementary wireless communication systems. With more than 2'600 employees worldwide, the Phonak Group is one of the three technology leaders in the hearing instrument industry.
