- Simply adapts to every sound environment automatically – no need to manually adjust the hearing aids³,⁴

* Expected results when fully charged, and up to 80 minutes wireless streaming time. Please refer to www.phonakpro.com/evidence
Phonak Bolero B-PR features a specifically designed built-in lithium-ion rechargeable battery that provides 24 hours* of hearing with one simple charge.

Phonak Bolero B-PR rechargeable hearing aids combine our latest high-performance technology with groundbreaking battery technology.

No more hassles with disposable batteries that are small and difficult to handle. Now you can enjoy the freedom and confidence of knowing that Bolero B-PR is conveniently charged and ready to take you through long days ... and nights, if necessary.

* Expected results when fully charged, and up to 80 minutes wireless streaming time. Please refer to www.phonakpro.com/evidence.
Smart charging options

Bolero B-PR gives you **24 hours** of hearing with a simple **3-hour charge**. If you’re in a rush, you can rely on a short 30-minute charge to give you up to 6 hours of full performance. Plus Bolero B-PR comes with **easy-to-use smart charging options**, to charge up wherever you are, without having to worry about running out of power.

* Expected results when fully charged, and up to 80 minutes wireless streaming time.

Sound is all around and changes constantly depending on where you are. This is what makes listening a real challenge and the task hearing aids have to perform very complex.

What makes Bolero B and Bolero B-PR so special is a unique operating system called AutoSense OS. It senses your surroundings and adjusts your hearing aids every step of the way. Just turn them on and the rest is automatic.

It doesn’t matter where you are or what you’re doing, Bolero B hearing aids were created to simplify your life. And now with the new rechargeable Bolero B-PR, you can enjoy 24 hours* of hearing with one simple charge.

* Expected results when fully charged, and up to 80 minutes wireless streaming time. Please refer to www.phonakpro.com/evidence
AutoSense OS analyzes the sounds around you every 0.4 seconds and can identify whether you're in a noisy restaurant, car, concert hall or at home. It draws upon multiple features, blending them to create over 200 distinct settings to precisely match your sound environment.

Without having to adjust your hearing aids manually, you can enjoy unmatched hearing performance and sound quality... wherever life takes you.², ⁴

When it's noisy around you, it becomes difficult to understand what is being said. For AutoSense OS to work effectively, it utilizes a technology called Binaural VoiceStream Technology™.

Two ears hear better than one and this doesn’t change when you wear hearing aids. Binaural VoiceStream Technology is designed to tackle challenging listening situations by simulating what the brain does with sounds from both ears. This linking of two hearing aids ensures that you benefit from hearing speech in both ears, especially in a noisy environment⁶, on the phone or when you can’t face the speaker.
Understand more in noise
60% improvement in speech understanding by zooming in on a single voice in a noisy environment - versus without hearing aids.⁵

Better speech understanding
20% better speech understanding thanks to the automatic selection of the best settings for everyday listening situation.³,⁴

Hearing in car
37% reduction in effort when listening to conversations in car – compared to prior technology.⁶

Hear quiet voices
10% improvement in soft speech understanding with our newest products.⁷

Natural music experience
Top rated hearing aid for music sound quality.⁸
Bolero B comes in 4 models, multiple performance levels and 9 colors to suit your individual needs.
Phonak offers a range of wireless accessories to boost the performance of your hearing aids if needed.

To enable you to understand even more while watching TV, talking on the phone or listening to music, we have developed wireless solutions to suit your every need. They also allow you to fully participate in noisy situations or when there’s distance between you and the speaker, or there are multiple speakers.

Phonak provides dedicated Roger wireless solutions for the modern workplace, where communication is key in order to succeed. Compatible with almost all hearing aids, these solutions make it easier for you to focus on work rather than on your hearing.
5. Phonak Field Study News, April 2011. StereoZoom Improved speech understanding even with open fittings.
