

What is Roger?

Roger is an intelligent wireless technology that transmits speech directly to hearing aids and cochlear implants. Functioning like a third ear, Roger allows people with hearing loss to learn, work and socialise more easily – a big step towards more inclusive societies and greater personal well-being.

Improved speech understanding in group conversations in noise with Roger*¹

Roger empowers you to communicate effectively in any work environment, enabling you to always be your most productive and creative self. It also makes sure you don't miss life's beautiful moments, allowing you to follow conversations, stay close to friends and family and enjoy an active social life.

* compared to hearing aids alone.

life is on

Since 1947, Phonak is dedicated to preserving social, emotional and physical life quality by opening new acoustic worlds. We believe that well-hearing equates to well-being and is essential to living life to the fullest. Today we offer the broadest portfolio of innovative solutions. And, together with our hearing care professionals, we keep on focusing on what matters most: improving speech understanding, changing people's lives and having a positive effect on society as a whole.

Roger On

Roger On™ is a unique microphone for everyday use in noise and over distance. Its award-winning design allows for different microphone modes to focus on conversations from all directions.

The confidence for everyday life

With Roger On, you can immerse yourself in conversations with ease while the microphone switches automatically between different microphone modes to adapt to your needs, wherever you are.

myRogerMic app lets you control your Roger On discreetly from your smartphone. You can also customize the microphone settings according to your environment and personal preferences.

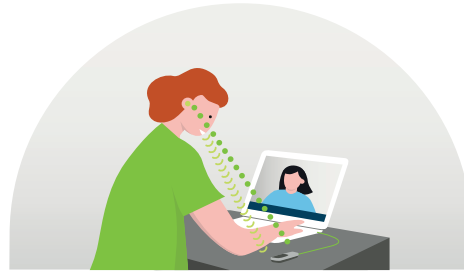

With up to 8 hours of continuous use on a fully charged battery, you can be confident that you won't get caught without power.

Versatility in your hands

Roger On is a third ear for virtually all difficult and ever-changing listening situations. It is also a complete solution for online calls. With two-way voice streaming, both you and your online counterparts can benefit from Roger technology during online meetings.

Here are some situations where Roger On can help you:

In headset mode for online meetings

On the table during meetings

On the table during lunch breaks

During coffee breaks

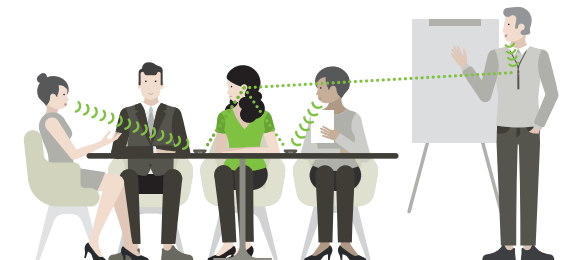

During one-to-one discussions

Carpooling to work with a colleague

During meetings with a presenter
