Dynamic FM for adults

Today is a
beautiful day

PHONAK

life is on

Your hearing aids might do their job perfectly well when it is quiet, but what about when there is more noise? In these situations Phonak's Dynamic FM systems can help.

When can a Dynamic FM transmitter help?

Talking in noisy situations

When having a conversation, background noises such as kitchen or TV sounds can be distracting and confusing. A Dynamic FM transmitter helps you focus on the speaker's words, not the sounds around them.

In the car

Phone calls and driving are not an easy mix, even when using a cellphone's speaker option. The Bluetooth technology built into SmartLink+ lets you connect this transmitter wirelessly to your cellphone for effective hands-free use.

When watching TV

It's not always convenient to crank up the TV's volume to suit you. With all three of Phonak's Dynamic FM transmitters there is another way: simply attach the device to your TV's audio output for crystal-clear audio enjoyment.

SmartLink+

Nothing less than the very best

Designed for those who demand the absolute best, this gadget-friendly Dynamic FM transmitter offers exclusive high-end features, including:

- Bluetooth connectivity for liberating hands-free cellphone use
- Advanced Bluetooth support for effective MP3 playback
- A hearing instrument remote control

The SmartLink+ also features: three intelligent microphone beam settings (*shown below*), Phonak's SoftLanding technology (ensuring that you don't hear a distracting bang when the transmitter is placed on a hard surface), a useful audio input that allows you to plug in and enjoy TV, PC and other media devices wirelessly, and a quick-charging battery.

Microphone settings for SmartLink+ and ZoomLink+

SuperZoom

The optimum setting for very noisy situations such as restaurants. The microphone picks up speech from the front and suppresses noise from all other directions.

Zoom

The standard setting for everyday situations such as face-to-face conversations and meetings.

ZoomLink+

Bringing the sound you want directly into your ears

This versatile Dynamic FM wireless microphone enables better hearing and understanding across a wide range of situations – from family gatherings and parties to restaurants, shopping malls and in the car.

This sleek, attractive device includes Dynamic FM technology for listening in very noisy environments, three intelligent microphone beam settings (*shown below*), Phonak's new protective SoftLanding technology, an audio input for effective wireless TV, PC and audio use, and a quick-charging battery.

Omni

Designed for quieter situations, this 360° setting picks up sound from all around the transmitter.

EasyLink+

Making any conversation easier to follow

Ultra-simple to understand and use, the EasyLink+ is an effective, single-button Dynamic FM microphone.

With just one press for On/Off switching and a fixed microphone beam setting, EasyLink+ offers the crystal-clear performance benefits of Dynamic FM in addition to Phonak's protective SoftLanding technology, the ability to plug into a TV, PC or other audio device for effective wireless listening, and super-quick battery charging.

Microphone settings for EasyLink+

Zoom

EasyLink+'s default setting is perfect for everyday situations such as face-to-face conversations and meetings. This setting can be re-programmed to SuperZoom or Omni by a hearing care professional.

Welcome to the world of Dynamic FM

Thank you for taking the time to learn more about Phonak's new Dynamic FM transmitters – SmartLink+, ZoomLink+ and EasyLink+.

By using these high-performance hearing products with the appropriate Phonak wireless receiver, you will be better able to understand speech in a range of situations, ensuring that today truly is a beautiful day.

The 3 new transmitters introduced here bring Phonak's crystal-clear Dynamic FM sound technology to adults for the first time, working with FM hearing receivers to give users with hearing issues a superbly clear link to the voice of the speaker.
