

Phonak Audéo Q

Small package. Big performance.

PHONAK
life is on

Interact • We believe every voice is important. Voices are our connection to the world and allow us to interact with loved ones, friends and the people around us. The clearer we hear, the more we can make ourselves heard.

Your voice matters

We have been listening to ensure we fully understand what matters to you. Each new generation of hearing aids is based on these insights.

We are proud to present Phonak Audéo Q, our new range of state-of-the-art hearing aids that virtually disappear behind your ear.

Designed to suit you

Design and colors

Phonak Audéo Q is available in three different styles, all offering a leading combination of size and performance.

The versatile choice of hair and skin colors enhances discreetness. The fashion and fun colors ensure we have something to suit every style.

Your life, your soundscape

Wherever you go, whatever you do, you expect to be able to hear and understand with confidence.

We do everything to fulfill your expectations to not only hear but also understand better in every situation, no matter how challenging.

The technology in Phonak Audéo Q products offers a host of unique features designed to enrich the listening experience in your day-to-day life.

Family reunions | Understanding on the telephone | Dinner at your favorite restaurant | Driving in the car | Enjoying the outdoors | Listening to music | Business meetings | Group gatherings | Places of worship | Watching television

Understanding everywhere

Phonak Audéo Q helps you to hear and understand in even the toughest listening environments.

Capturing voices in both ears

Our unique Binaural VoiceStream Technology™ detects the speech signal and ensures that you can hear it clearly in both ears. This means that you will understand better in more listening situations.

Speech in Wind – enjoy conversations even on a windy day

When wearing hearing aids, wind noise interferes with speech understanding and listening comfort. With the Speech in Wind feature, Audéo Q enhances your ability to understand speech well, even when the wind is blowing.*

auto StereoZoom – extracts the single voice you want to hear from a noisy crowd

When noise reaches a level that makes understanding one person in a crowd difficult, auto StereoZoom is automatically activated, allowing you to focus on the voice you want to hear.*

DuoPhone – makes understanding on the phone easy

As soon as you hold the phone to your ear, the caller's voice is automatically streamed to the other ear. Hearing the conversation in both ears results in superior sound quality and improved understanding.*

* Research at the Phonak Hearing Center has shown an increase in speech understanding of up to 40% in wind (Speech in Wind) and 45% in noise (auto StereoZoom). DuoPhone has shown an average improvement of 10% compared to using a dedicated monaural phone program.

Understanding with comfort

We know that engaging in conversations wherever you are is a top priority; however comfort is just as important.

Phonak Audéo Q comes with a host of comfort features that can be set to your individual needs. They effectively eliminate uncomfortable and unwanted sounds when they occur.

NoiseBlock – for more comfort in noise

Reduces uncomfortable background noise such as traffic or the constant hum of a ceiling fan without affecting your ability to understand.

SoundRelax – for a more relaxing experience

Softens sudden loud sounds such as slamming doors or clattering dishes.

WhistleBlock – for an overall pleasant listening experience

Eliminates whistling so you can relax and enjoy better hearing.

Understanding everything

Enjoying laughter, children's voices or the subtle sound of rustling leaves under your feet enriches your hearing world. Hearing the nuances of life's soundscapes is part of the joy in rediscovering the pleasures of good hearing.

Phonak Audéo Q has unique proven technologies that will exceed your expectations.

SoundRecover – lets you hear and understand new things every day

Makes high-pitched sounds such as birds singing, crickets chirping, children's voices and the ring of a doorbell audible again.

UltraZoom – lets you enjoy every part of the conversation

Enjoy a lively conversation while noise from the side and back fades into the background.

Connect and communicate

Today's interactive world of mobile phones, computers, TVs, game consoles and MP3 players can present a challenge if you wear hearing aids.

The Phonak Audéo Q-312 and Q-312T models can be easily connected to all of these communication and media options. Our host of proprietary digital wireless accessories allow you to connect, communicate and hear at your best whenever needed.

Phonak ComPilot – the hub that wirelessly connects your hearing aids to a variety of communication and media devices.

Phonak RemoteMic – together with the ComPilot, it takes the strain out of conversations, especially when the person you want to hear is at a distance.

Phonak TVLink S – together with the ComPilot, it wirelessly streams stereo sound quality from your TV to your hearing aids.

Phonak Audéo Q – The Phonak Tinnitus Solution

Tinnitus is commonly known as a "head noise" or "a sound in the ears." It is defined as the perception of sound in the absence of an external sound source.

Tinnitus is a condition that affects 15% of the adult population. There is a strong link between tinnitus and hearing loss. Four in five people who live with tinnitus, also have hearing loss.

While there is no cure for tinnitus, there are many proven management strategies to help those who live with hearing loss and tinnitus. Sound enrichment is central to many of these approaches. By giving access to more sound, hearing aids serve as an effective approach for managing tinnitus.

Built into all Audéo Q hearing aids is a further option for sound enrichment. This approach reduces the annoyance of tinnitus. Regardless of which Audéo Q model you choose, this tinnitus option is available.

Request the best

Phonak Audéo Q comes in a variety of styles and performance levels. Together with your hearing healthcare professional you can choose the best solution to match your lifestyle, degree of hearing loss and your budget.
